CHECKLIST

Your dark hallway lighting checklist

- [ ] Replace ceiling bulbs with warm white and check the difference
- [ ] Add wall lights at shoulder height, spaced in a rhythm
- [ ] Position a mirror to reflect a light source, not a blank wall
- [ ] Fit task lighting near mirrors and coat hooks
- [ ] Choose the same colour temperature across all fittings
- [ ] Install a dimmer or separate switches for different layers
- [ ] Test battery-operated or plug-in lights if rewiring is not an option
