CHECKLIST

Layering blinds and curtains: installation checklist

- [ ] Measure the blind's depth from the wall when fully raised
- [ ] Add eight centimetres to that depth for the curtain track projection
- [ ] Check the lintel or wall above the window will hold the track's weight
- [ ] Mount the track level and test it moves freely before fixing permanently
- [ ] Hang the curtain and pull it across to check it clears the blind
- [ ] Position the blind control on the opposite side to the curtain cord
- [ ] Test both treatments from the position you will use them most often
