CHECKLIST

Arranging a Room With Multiple Doors

- [ ] Stand in each doorway and trace the natural path to the next one
- [ ] Measure the wall space between doors and match furniture to those dimensions
- [ ] Float a sofa or chairs away from the wall to create a seating zone
- [ ] Use a rug to anchor floating furniture and define the area
- [ ] Replace large pieces with smaller modular ones that do not need wall support
- [ ] Add floor lamps or pendant lights to avoid relying on wall-mounted fittings
- [ ] Test the layout for a week and adjust if people keep sidestepping furniture
